

DiSC Profiles

Developed and refined over decades of use, Inscape Publishing's DiSC instruments are based on a simple idea—that the foundation of personal and professional success lies in knowing yourself, understanding others, and realizing the impact of your actions and attitudes on other people.

DiSC Dimensions of Behavior provides a non-judgmental language for exploring behavioral issues. It helps people explore behavior across four primary dimensions:

- 
- * Collecting data on employee opinions, developmental needs and interpersonal strengths
 - * Creating and monitoring developmental activities and organizational improvements
 - * Creating a baseline for future performance improvements
 - * Conducting general needs assessments for training and other topics

DiSC Classic Profile Online 2.0

DiSC Classic is a multi-level learning instrument that helps individuals assess to what degree they utilize each dimension of behavior in a situation. The instrument then provides feedback designed to help people in your organization:

- 
- * Collecting data on employee opinions, developmental needs and interpersonal strengths
 - * Creating and monitoring developmental activities and organizational improvements
 - * Creating a baseline for future performance improvements
 - * Conducting general needs assessments for training and other topics

We offer a wide variety of other DiSC reports through Inscape Publishing. Please call or email for details.
